

Online Document Management System

Secure, Version-controlled Document Management Systems for Engineering and other documented information.

PRO-DMS is a comprehensive document management system designed to support complex engineering projects. Our platform provides a secure, version-controlled environment for managing multiple file formats, role-based access, document indexing, automated transmittals, and other essential design control processes.

Key Features

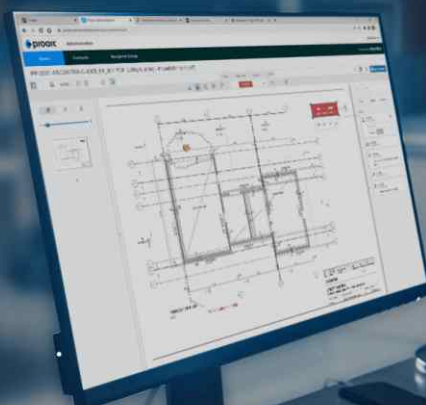

Multiple File Format Support: Manage a wide range of file formats, including CAD files, PDFs, Word documents, Excel spreadsheets, and more.

Role-Based Access Control: Assign specific roles and permissions to users, ensuring that sensitive information is only accessible to authorized personnel.

Document Indexing and Management: Easily search, retrieve, and manage documents using customizable metadata and indexing.

Automated Transmittals: Streamline communication and collaboration with automated transmittals, including email notifications and document sharing.

Version Control: Track changes and revisions to documents, with version control and audit trails.

Integrated Essential Design Control Processes

Change Management: Manage changes to documents and designs, with automated workflows and approval processes.

Design Review and Approval: Streamline design review comments and approval processes, with customizable workflows and notifications.

Document Approval: Ensure that documents are properly approved and validated, with automated approval workflows and checklists.

Compliance and Regulatory: Meet regulatory requirements, including ISO 9001, AS9100, and FDA 21 CFR Part 11.

Benefits

Improved Collaboration: Enhance collaboration and communication among team members, stakeholders, and partners.

Increased Efficiency: Automate manual processes, reducing errors and increasing productivity.

Enhanced Security: Ensure the security and integrity of sensitive information, with role-based access control and version control.

Compliance: Meet regulatory requirements, reducing the risk of non-compliance and associated penalties.

How PRO-DMS Supports Your Organization

Engineering and Design: Manage complex engineering projects, including design files, simulations, and analysis.

Manufacturing and Production: Streamline manufacturing and production processes, with automated document management and transmittals.

Quality and Compliance: Ensure compliance with industry and regulatory requirements, including quality management and document control.
